

April 20, 2007

Dear San José Residents:

The City of San José is embarking upon an important effort to identify community priorities related to the maintenance of our streets and transportation system, and your participation is critical to the success of this effort. I hear from residents regularly about how important it is to fix our streets and potholes. In an effort to focus on this priority, the Mayor and City Council directed the development of a Transportation Maintenance Master Plan to assess the condition of the street system, and to determine the costs to make the necessary repairs to restore our streets to good condition.

In developing the Master Plan, the City is asking residents to provide feedback on the following:

1. What street and transportation assets in the City are most important to fix?
2. What types of alternate funding sources would you consider supporting to fix them, if any?

It is important that the City hears from as many residents as possible about your priorities, concerns, and possible solutions to this challenge. A community outreach process has begun starting with 10 community meetings throughout San José and I encourage my fellow residents and the City Council to attend the meetings over the next month. You can obtain more information about the process by calling (408) 535-3844, e-mail at [streetmaintneeds@sanjoseca.gov](mailto:streetmaintneeds@sanjoseca.gov), or visit us at [www.sanjosecagov/transportation/streetmaintneeds](http://www.sanjosecagov/transportation/streetmaintneeds). Thank you!

Sincerely,

Chuck Reed  
Mayor
